

Advantage Powerpoint Presentation

The Perfect Blockchain

No Speculation, just dividends,
Advantage is the perfect Blockchain.
Stable alternative to traditional speculation.

The *first* Proof of Stake Stabletoken.
Dividend payments and global remittance;
Token remittance starting at 5.00%.

USDX-TOKEN is a token pegged to the U.S
dollar. Each token remains \$1.00 U.S dollar
and will trade USDX-TOKEN:USD on
exchanges.

Big Block Reward

82.00% Block Reward

By leveraging the world wide web,
tokens can be remit worldwide for
5.00% and 82.00% of collected fees go
back to users.

+ Masternodes: 20.00%

+ Token holders: 57.00%

+ Advantage: 18.00%

+ Community Chest: 5.00%

USDX-TOKEN Payment Flow-Chart

Advantage A-B Payment Flow-Chart

Wallet A wants to send tokens to wallet B

A pays the sending fee and the transaction details go in a block.

The transaction is broadcasted for all nodes to confirm.

The tokens go from wallet A to wallet B

The block is added to the blockchain. The block reward is disbursed.

Enough nodes validate the transaction.

Advantage Development

Electronic USDX-TOKEN

Advantage is the best Blockchain.

Capable of distributing dividends to potentially millions of people simultaneously. Each token remains valued at \$1.00 U.S dollar always; remits worldwide for 5.00%.

First, an initial framework of tokens are minted, tokens get acquired by mining or purchasing/trading on a cryptocurrency exchange for 1.00 U.S dollar each.

Users earn daily compounding tokens by storing USD-ONE tokens in their wallets for at least 24 hours. Dividend payments begin, called smart-sharing.

Network capability, Advantage Blockchain can handle 30,000 transactions per minute using a 1mB block and 300,000 transactions per minute using a 10mB block size.

Introducing The USDX-TOKEN

Mine Using Just Your Wallet with a Token Worth \$1.00 USD

Ultimate Opportunity

- + USD-ONE tokens keep a valuation of \$1.00 U.S on the ticker USDX-TOKEN:USD.
- + 57.00%, of remittance fees are rewarded to USDX-TOKEN holders.
- + Advantage is 99.00% more energy efficient than Bitcoin mining.
- + The more tokens you carry, the more frequent and sizeable rewards deposited to your wallet account.

Masternodes

Set up Masternodes, special nodes, to access the Masternode 20.00% reward pool. Costing 5,000 tokens to operate.

Masternodes are nodes that operate 24/7 and receive 20.00% of collected remittance fees.

Community Chest will be a fun, user driven, diverse chest opening once a month. 5.00% of all collected funds go to this Community Chest each month. Users vote to decide where the funds go via Discord voting.

Advantage Blockchain Ledger

Benefits of a Global Transaction Ledger

Transparency

The global Advantage transaction ledger lends transparency to all transactions, and includes time/date, amount and Block ID.

AML

Advantage wishes to fully comply with anti-money-laundering practices and seeks to craft strong ties with regulators.

Receipt

Each transaction can be easily brought up in the wallet or the transaction ledger and provides a clear receipt of all spendings.

Advantage Blockchain Settings

Blockchain Analytics

Block Timer

Blocks are data compartments that store transaction data; lasting 60 seconds each.

Block Confirmation

Each transaction must be confirmed by nodes on the network and by at least 2 Masternodes to fully deploy.

Block Size

Block transactions are estimated at 0.3kB and the size Block size is 1mB - 10mB.

Block Rewards

Block rewards are comprised of collected transaction fees and 82.00% are rewarded.

Block Confirmation

Transactions are confirmed through Block confirmations and require 5 minutes to complete.

Advantage Ecosystem

B2B and P2P Transactions Make Advantage Useful

Advantage is a dynamic Blockchain that will allow peer-to-peer (P2P) and business-to-business (B2B) transacting, because each token stays at \$1.00 U.S dollar.

B2B transactions will create a portion of the economics behind Advantage, due to the price of each token being essentially U.S dollars and the easy, and a non-reversible easy sending process.

Payments are non-reversible, which often can be reversed. Once a payment is received it is permanently added to the Blockchain.

P2P transactions will create a community around USDX-TOKEN and the Advantage Blockchain. Advantage seeks to create a long standing tight-knit community of Blockchain proponents.

Overall Review of Advantage

Review of the Advantage Blockchain

This **Powerpoint** on Advantage Blockchain along with the USDX-TOKEN electronic token presents the viability of producing an ROI%, to potentially millions of people simultaneously, though the Blockchain, while providing global remittance services; starting at 5.00%.

Advantage is the *first* Proof of Stake Stabletoken.

Advantage Blockchain provides 82.00% of dividends back to users on the Blockchain.

Advantage is worth doing because it provides financial independence from controlling banks, payment processors and credit cards that can shut down accounts without warning.

Advantage is the first Blockchain to tie a U.S dollar backed token to a Proof of Stake dividend reward system.
